Textbooks: **Organizational Culture and Leadership**
Fourth Edition (2010), by Edgar H. Schein; Jossey-Bass
ISBN: 978-0-470-19060-9 (paper).

Last Revision: August 29, 2018

CATALOG DESCRIPTION

The course provides a comprehensive survey of the major theories and research on leadership and managerial effectiveness in organizations with practical suggestions for improving leadership skills. The nature and attributes of leadership are investigated through case studies, biographies, and class presentations. Topics include the difference between leadership and management as well as identifying traits and abilities which have distinguished effective leaders from ineffective ones. (3 units)

Prerequisite: BA 308

EDUCATIONAL OBJECTIVES

The purpose of this course is to introduce students to the logic, the scope and challenges of effective leadership. Students will be taught organizational culture and organizational behavior. Students will be able to assess how to manage organizational culture and how to develop new leadership roles. Further, students will be taught how to perform job analysis, and how to assess organizational effectiveness.

COURSE LEARNING OUTCOMES*

	Course LO	Program LO	Institutional LO	Assessment Activities

4	Students will be able to assess the influence of culture on organization's ethical performance.	PLO 6	ILO 3b	In-class discussion, Presentation

INSTRUCTIONAL METHODS

This is a direct classroom instruction course.

Lecture method is used in combination with case studies and outside readings, as assigned. The emphasis will be on learning. Every student must participate in an intensive preparation and classroom activity. The emphasis will be on learning by examples and solving problems. Every student is welcome to participate in intensive classroom activities and discussions. Reading and problem solving assignments will be given throughout the course. Video materials will be presented. There may be class discussions and group presentations by students on the project assignments during class.

Assignments and projects require students to actively use resources of the library. Detailed guide to business *resources of the library* as well as the description of Lincoln University approach to *information literacy* are available at the [Center for Teaching and Learning](http://ctl.lincolnuca.edu) website (ctl.lincolnuca.edu).

CLASS ATTENDANCE

Students are expected to attend class on a regular basis. Attendance is crucial to performing well in this course, as some of the material presented may not be found in the textbook. Further, the lecture and classroom demonstrations will emphasize and expand upon important topics found in the textbook. Thus, it is vital that you take thorough notes in class.

* Detailed description of learning outcomes and information about the assessment procedure are available at the [Center for Teaching and Learning](http://ctl.lincolnuca.edu) website (ctl.lincolnuca.edu).

ASSIGNMENTS

There will be a bi-weekly homework assignment given out on Tuesday of each other week. The homework assignments will typically consist of some theoretical exercises, conducting analyses on provided data and turning in a results report (write-up) describing the findings, but may include other questions. The purpose of the assignments will be to provide a medium through which you really learn the material. Students are welcome to work with other classmates on the homework, but it is expected that each student turns in his/her own, independently written, homework. Any indication that work was directly shared will not be tolerated and will result in a non-passing grade.

Please bring a **hard copy** of your **typed and stapled** homework assignment that has your name on it to class the day it is due. **Please no e mailed assignments. No late homework will be accepted!**

There will be a number of readings (mostly journal articles) assigned periodically in addition to the reading in the textbook. There will be homework and a project.

In accordance with the university policy on cheating and plagiarism, any student who does not do his/her own write-up completely independently on any assignment will fail the assignment.

EXAMS

There will be two exams — a midterm and a final. To assess your learning in this course, exam questions will be derived from the lecture and textbook. Topics covered in lecture will be of major emphasis on the exam, and should be the focus of your textbook readings, though there will be some test questions found in the assigned readings but not covered in the lecture. To avoid guessing, there will be no multiple-choice questions on the exams. Exams may include conceptual or theoretical questions, and questions with applied scenarios. **All exams are open books and open notes.**

QUIZZES

To encourage attendance and to help students with assessment of their knowledge, there will be a set of unannounced quizzes given at the start of class. They will be based on lecture and any assigned reading. They will not be computational in nature, but rather conceptual questions intended to help students gauge how well they understand the material.

GRADING PLAN

Percentage	Grade
90-100%	A
80-89%	B
70-79%	C
60-69%	D
below 60%	F

Weights	
Homework	20%
Quizzes and class participation	10%
Midterm	30%
Final	40%

CLASSROOM POLICY

Please do not use personal computers, iPads or smart phones during the lecture. If you do need to text message or receive a call, please take it outside the classroom.

I am available and will do my best to help you learn and succeed. Questions and points of discussion are encouraged. I am also highly accessible for discussions if you wish to receive additional information or learn more about a certain topic or need help with data analysis. Please visit me during my office hours, or talk to me immediately after class, if you need study tips or additional help. No appointment is required for my office hours.
