Revised: August 11, 2021

Catalog description

Interrelated study of the economic potential and history of various areas of the world, including United States. The course also considers the reciprocal relationship between the economic activities of man and earth surface features, population, human production, consumption, distribution. Analysis of the natural and economic functioning units and correlation of the diverse relationship recognized. (3 units)

Course Overview

The spatial distribution of economic activities (production, transfer, or consumption), being a reflection of the interplay between numerous institutional, political, social and economic factors, defines a complex interrelated character of life and business in modern globalized environment. In our study we will combine elements of economics, geography, international business and history in order to examine forces that shape the way the world develops. We will acquire a deeper understanding of intricate relations between various areas of the world and learn how to apply it in business environment.

Course Learning Outcomes¹

Upon completion of the course students will be able to:

1. Demonstrate the understanding of key ideas and concepts explaining the spatial distribution of economic activity (GELO 1)
 - a. *Assessment Activities*: Home assignments, midterm/final exams
2. Demonstrate the understanding of processes (both global and regional) shape countries' economic organization as well as development trends (GELO 1)
 - a. *Assessment Activities*: Home assignments, midterm/final exams
3. Critically analyze various types of political, legal and economic systems as well as corresponding threats and opportunities for business as well as for global development (GELO 4)
 - a. *Assessment Activities*: Home assignments, course project
4. Implement their knowledge of economic geography to critically analyze risks and benefits for international business activities as related to global investment and marketing strategies (GELO 4)
 - a. *Assessment Activities*: Home assignments, course project

Procedures and methodology

This is a direct classroom instruction course.

Lecture method is combined with in-class discussions, case studies and home assignments of various kinds. Core concepts identified from the textbook will be augmented with supplementary sources (made available to students on the class website) and applied to the real life situations during class activities.

Assignments and projects require students to actively use resources of the library. Detailed guide to *resources of the library* as well as the description of Lincoln University approach to *information literacy* are available at the [Center for Teaching and Learning](http://ctl.lincolnuca.edu) website (ctl.lincolnuca.edu).

Class Rules

1. Class attendance is required. Attendance will be taken each class at a time chosen by the instructor.
2. Students are required to arrive to class on time.
3. Submissions of home assignments will be conducted via the course website only (Canvas). No hard copy or email submissions will be accepted.
4. Registering on the class website is the responsibility of a student.
5. All quizzes, exams, assignments, and projects must be completed and handed in on time. Late submissions will result in lower grade (each day of delay costs 4% points).
6. Detected cheating/plagiarism will result in “F” for the assignment.

¹ Detailed description of learning outcomes and information about the assessment procedure are available at the [Center for Teaching and Learning](http://ctl.lincolnuca.edu) website (ctl.lincolnuca.edu).

Course Project

Every student must complete a research project focused on the critical analysis of a selected problem in global economy for an in-class presentation. Specific format and research topics will be determined later and discussed in class. Research projects must comply with the Lincoln University guidelines.

Exams

The exams will consist of questions based on lectures, assigned chapters and supplementary reading.

Assessment Criteria

All assignments, quizzes, projects and exams are evaluated using the indicated system:

94-100	A	73-76	C
90-93	A-	70-72	C-
87-89	B+	67-69	D+
83-86	B	60-66	D
80-82	B-	50-59	F
77-79	C+		

Tentative Weights

Final grade will consist of the following components:

Class Activity	15%
Project	25%
Midterm Exam	25%
Final Exam	35%
