A significant part of the learning experience in this course is the **Company Analysis**. By Week 3 you will select a publicly traded company for a detailed analysis. Your mission is to perform a thorough analysis of the company and then to identify and recommend potential candidates for the position of CEO of the company. Some of the key issues to be considered in your company analysis include:

- 1) Key strategic issues facing the company- is the company successful or does it need a change in direction to spur growth and profitability?
- 2) For a new CEO - insider versus outsider considerations. Do you bring in someone new to the industry to shake-up the established company culture? Or do you recommend a senior manager currently with the company to maintain organizational continuity during the change.
- 3) The company culture - is it entrepreneurial? Established? A result of a merger?
- 4) Make-up of the Board. Are they independent directors? Part of the established management?
